Sack truck

Platform truck

Pallet truck

Sack trucks

Load capacity: Up to 70 kg to 200 kg.

Types of sack trucks available: Everyday lightweight, mini compact or heavy duty.

Sack trucks, also known as barrow trucks, are versatile and used to manoeuvre heavy loads within a warehouse and in logistics. The rubber wheels are ideal for varied and uneven surfaces, and areas prone to dampness such as a courtyard. The different handle types are used to aid manoeuvrability.

Dollies

Load capacity: Up to 240 kg to 250 kg.

Types of dollies available: Plastic or plywood.

Dollies are suitable for the warehouse, moving a range of lighter loads, and small loads quickly, dollies can also be used for transporting unloaded or lighter pallets. The wheels are made from nylon casters so no static is produced meaning a smoother movement.

Platform trucks

Load capacity: Up to 150 kg to 500 kg.

Types of platform trucks available: Compact or heavy duty.

Platform trucks are similar to sack trucks but more versatile. Platform trucks are predominantly used inside the warehouse for transporting heavier, bulkier and larger loads.
